

Dear Customer-

This letter is to inform you that DMWA is not responsible for repairing any damages accrued during the manipulation (turning on and off) of curb stops. If a failure would occur, the owner is responsible for all cost associated to the repair. If the failure would happen between the curb stop and the corp., immediate action must take place to repair the failure. If the owner cannot immediately repair the failure, then DMWA will repair the failure at the owners expense/cost. Please sign and date acknowledging that you have read and understand these terms.
